

PROJECT RANGE

ARROW  TM

OUR STORY

The foundations of SAL Commercial date back to 1998 with the establishment of Sunny Lighting Australia, a family owned business. The Australian owned and operated business methodically developed a widespread reputation as a trusted brand in the Australian lighting community.

Global market challenges and the dynamic evolution of LED technology catapulted Sunny Lighting Australia to the forefront of the lighting industry, manufacturing and supplying cutting edge solutions for the wholesale channel. Decades on, the 100% Australian owned company now known as SAL National has continued to build on its brand reputation for quality product and exceptional service to be a leader of lighting technologies in the 21st century.

SAL Commercial has established itself as an organisation that understands all aspects of the project lighting market. With a desire to challenge the status quo of the lighting industry and develop class leading products that not only enhance the experience for end users but offer class leading features and performance to those who design, specify and who install our products.

SAL Commercial is proud of our rich history in the Australian lighting landscape and steadfast in the belief that we can help to shape the lighting industry as the world becomes more dynamic and flexible for decades to come.

SAL Commercial has established key partnerships with the worlds leading technology companies, providing the ability to handle projects of all sizes with a focus on delivering best in class results for lighting and quality.

There are many links to the project lighting chain and at SAL Commercial, it is our duty to ensure the end to end solution delivers successful outcomes.

PROJECTS

HIGHLIGHTS

MADE TO PROJECT SPECIFICATIONS

The Arrow X Project range is manufactured to the exact specifications of your project. Available in suspended, surface mounted and recessed models.

DIRECT / INDIRECT ILLUMINATION

Arrow X™ products offer the flexibility of selecting optional indirect illumination, controlled independently from the direct light source.

POWERED BY TRIDONIC

The complete Arrow X™ range are powered by Tridonic control gear, delivering the latest technology and ensuring performance and reliability for the lifetime of the product.

MAGNETIC END CAP

Arrow X™ pendants and surface mount profiles are supplied as standard with a tool-free, magnetic end cap. Engineered to completely remove any light leakage, and to offer ease of access for serviceability.

SAMSUNG LED TECHNOLOGY

All Arrow X™ products are manufactured using high output Samsung LED chip technology ensuring reliability and performance for the lifetime of the product.

LED Lifetime L80/B10 @ 81,000 hours

MADE IN AUSTRALIA

The Arrow X™ range is a linear lighting system constructed from extruded aluminum and proudly made in Australia.

SUSPENSION OPTIONS

Arrow X™ suspended models are offered with either high quality stainless steel cable suspension kits or a rod suspension system.

OPAL DIFFUSER

All profiles are supplied with a UV stable, low glare polycarbonate diffuser creating consistent, spot free and linear illumination.

WIRELESS INTEGRATION

The entire Arrow X™ range can be specified with Casambi integration. Utilising Tridonic control gear, customised switching and dimming profiles are simple to set up and commission using wireless technology.
