Trim**

OUR STORY

The foundations of SAL Commercial date back to 1998 with the establishment of Sunny Lighting Australia, a family owned business. The Australian owned and operated business methodically developed a widespread reputation as a trusted brand in the Australian lighting community.

Global market challenges and the dynamic evolution of LED technology catapulted Sunny Lighting Australia to the forefront of the lighting industry, manufacturing and supplying cutting edge solutions for the wholesale channel. Decades on, the 100% Australian owned company now known as SAL National has continued to build on its brand reputation for quality product and exceptional service to be a leader of lighting technologies in the 21st century.

SAL Commercial has established itself as an organisation that understands all aspects of the project lighting market. With a desire to challenge the status quo

of the lighting industry and develop class leading products that not only enhance the experience for end users but offer class leading features and performance to those who design, specify and who install our products.

SAL Commercial is proud of our rich history in the Australian lighting landscape and steadfast in the belief that we can help to shape the lighting industry as the world becomes more dynamic and flexible for decades to come.

SAL Commercial has established key partnerships with the world's leading technology companies, providing the ability to handle projects of all sizes with a focus on delivering best in class results for lighting and quality.

There are many links to the project lighting chain and at SAL Commercial, it is our duty to ensure the end-to-end solution delivers successful outcomes.
